

Outstanding, Consistent Performance

Searching for a consistent and efficient method to clean small parts like wire drawing dies? Look to the Fort Wayne Wire Die USC400 Series Ultrasonic Die Cleaning System for your answer. The USC400 Series Cleaners are table top 80Khz ultrasonic die cleaners designed for durable operation to clean wire drawing dies and other small parts in your die room or quality assurance areas.

Clean Parts Conveniently

Designed for safe and consistent operation, the USC400 Series Ultrasonic Die Cleaners from Fort Wayne Wire Die offer a convenient method for cleaning wire drawing dies and other small parts.

The USC400 Series utilizes a 80Khz ultrasonic operating frequency which allows for optimum cavitation to ensure clean parts in a highly efficient manner. This system produces continuously shifting wavebands which results in an evenly distributed cleaning output that will thoroughly clean small parts.

Features included in the USC400 Series are adjustable thermostatically controlled heaters, corrosion-resistant stainless steel tanks and enclosures and an analog timer.

The user has the ability to adjust and control the temperature of the cleaning fluid through the adjustable thermostatically controlled heating controls. Reaching and maintaining the correct fluid temperature is important in receiving peak cleaning performance from the USC400.

The USC400 Cleaners are equipped with a cover and perforated basket suitable for cleaning small parts. A drain hose is incorporated into the tank for easy cleaning.

A solid warranty backs the performance of the USC400 Cleaners. A two-year parts and labor warranty along with a ten-year warranty on the transducer is offered.

The USC440 has a 10.4 liter tank (2.75 gallons) and is available in 110V/60Hz and 220V/50Hz.
